

adjustments, and its side-focus knob provides a crisp, clear picture at any distance.

Like its little sister, the 3-12x44 Elite 4200, the 6-24x50 Tactical FFP scope features fully multi-coated lenses for 95 percent light transmission. The lenses sport Bushnell's RainGuard HD coating.

The scope's mil-dot reticle is green-illuminated along the first focal plane to help shooters overcome low-light shooting conditions and allows shooters to use the mil-dot reticle at any power. (bushnell.com; 800-423-3537)

Butler Creek Scope

Covers: This new set offers high-quality protection from dust, dirt and abrasion, and fits tactical red-dot 30mm tubes. They quickly fold down with a finger push when time is critical, and have rudimentary sights on top for emergency use. (butlercreek.com; 800-423-3537)

multi-coated optics, but also features an adjustable objective that provides automatic parallax corrections from 7 yards to infinity.

The scopes come with mounting rings and are available in matte black or silver. Their turrets are finger-adjustable, and the scopes are nitrogen-purged, totally waterproof.

The 2-7X measures 11.8 inches, with 3 inches of eye relief. The 3-9X measures 12.4 inches, weighs 17 ounces, and has 2.9 inches of eye relief. (konususa.com; 305-884-7618)

Butler Creek Scope Covers

Leatherwood/Hi-Lux 1-4X CMR:

The 1-4X CMR scope is light, bright and built to handle up-close-and-personal hunting situations in dense cover, for whitetails or dangerous game.

The scope is relatively short at 10.2

inches, has 3.5 inches of eye relief, and is built on a 30mm tube for bright, clear pictures. Featuring a circular tactical reticle for quick target acquisition, its reticle has only a horizontal crosshair and partial vertical lower crosshair, leaving the reticle's upper half clean and uncluttered.

The lower crosshair features short-bar aiming points calibrated for standard .223 and .308 service ammo. Simple ranging brackets allow shooters to determine target distances quickly and easily. The center dot and small circular reticle surrounding it can be illuminated (red or green).

The 1-4X also features Hi-Lux's Zero Locking System, so once the scope is sighted in, alignment can be locked. (hi-luxoptics.com; 888-445-8912)

Leupold Mark 4 ER/T: The Leupold Mark 4 ER/T 6.5-20x50mm M5 rifle-scope features an Xtended Twilight Lens System with a clear, bright sight picture for exceptional target discrimination at all

Insight Technology Mini Red-Dot: The MRDS Mini Red Dot Sight is a rugged, lightweight, reflex sight that mounts to many optics, or M1913 and Weaver-style rails, with aftermarket mounts.

Available in non-reflective black or tan, with 3.5 MOA or 7.0 MOA dot size, it's easily adjustable for elevation and windage with 1 MOA clicks. It features auto-adjusting dot intensity, plus a manual dot intensity adjustment with four brightness settings.

The 0.85-ounce MRDS's lens is made from impact-resistant polymer with an anti-reflective coating. Its rugged housing is molded from advanced polymers, reducing weight without sacrificing durability, is powered by one 1632 battery for one year in auto mode, top-loading for no loss of zero when changing batteries. (insighttechgear.com; 877-744-4802)

Konus Riflescopes:

The KonusPro 2-7x32 is ideal for .22-caliber rifles, and ideal for shooting at short- to medium-range or fast-moving targets. Like the 2-7x32, the 3-9x32 features an engraved reticle and
